Job Description – Core Cutter

Job Responsibilities:

- Work closely in support of the geotech and logging geologist to process drill core
 - Cut drill core with a masonry saw according to the specifications set by your supervisor
 - Minimize sample loss and keep core in the correct order and orientation
 - Organize core in the box prior to cutting such that the samples represent what came out of the ground as closely as possible
 - Stacking/unstacking core
- Maintain a high *Quality Assurance/Quality Control* standard in order to keep samples properly organized, labeled and catalogued
- Maintain a daily progress record
- Maintain a commitment to health and safety, including wearing required Personal Protective Equipment (PPE)

Qualifications/Skills:

- Attentive to detail and always alert to ensure safety
- Able to take instructions and communicate with co-workers
- Able stand for long periods of time and lift loads up to 50 pounds
- Familiarity with power tools and machinery is a plus
- Ability to travel to and live in primitive remote work sites for up to 6 weeks

Education, Experience, and Licensing Requirements:

- Valid driver's license is preferred, but not required

Compensation:

DOE
